Akash Kalyanashetti
Aspiring Full Stack Developer

SUMMARY

With hands-on experience in developing web applications, I have worked with MVC architecture, REST API's, Reusable functional components and its life-cycle methods along with React Hooks. I am skilled in handling user authentication and authorization. I have worked with MongoDB database and Express JS in the backend.

TECHNICAL SKILLS

Languages: JavaScript - ES6, ES5.
Front-End Technologies: HTML5, CSS3, React.js, Redux, ANT Design.
Databases: MongoDB.
Backend-Technologies: Node JS and Express JS.
Tools: Postman, Vs Code, Balsamiq.

RELEVENT SKILLS

 AJAX, JSON, REST API, Git, Github, JWT, Local Storage, ES6 Promises, Mongoose,React-Router-DOM,Axios

INTERNSHIPS

Software Trainee Intern.   Oct '22 - Mar '23

DCT Academy,Bangalore.   Bangalore

"I completed an extensive 6-month training program to acquire full stack development skills utilizing the MERN stack. During this training, I gained significant practical experience through various projects and numerous challenging assignments."

CERTIFICATIONS

- **Post Graduate Program in Full-Stack Development** | Certified by DCT Academy,Bangalore.
- **Post Graduate Program in Front-End Development** | Certified by DCT Academy,Bangalore.

PROJECTS

Study Center Management System. (ongoing)   Present
GitHub:

- 24/7 study centers offer a comfortable and safe environment for students to study at their own pace, regardless of their schedule providing facilities such as AC, Wi-Fi connectivity, mineral water, access to reading materials, and lockers.
- Conducted extensive survey and research on various problems faced by them,using reliable sources to gather relevant information and analyze data to come up with a solution.
- Implemented a digital solution called STUDY CENTER MANAGEMENT SYSTEM to manage study centers more efficiently.
- Eliminated the inconvenience caused to users due to manual management of study centers.
- Improved user experience by providing a user-friendly interface for managing study centers.
- Developed a platform for online booking of study centers and subscription renewals using *React Js, Redux, React-Router-Dom, Axios, Node, Express, MongoDb, Ant D, Formik, Yup, and other npm packages.*
- Implemented an admin dashboard for efficient management and maintenance of study centers.

Budget and Expense tracking App
GitHub:

- A budgeting app enabling user to sign up and sign in and create a budget.
- The app has an intuitive user interface designed using React.js. It features a dashboard that displays spending trends and allows users to quickly add, edit, and delete expenses.
- The app has robust authentication and security features. It uses JWT (JSON Web Token) authentication to secure user data and prevent unauthorized access.
- The app has data visualization features that provide users with an overview of their spending patterns. The app displays charts, tables and graphs that help users identify trends and make informed decisions about their expenses.
- Users can also upload and download invoice pdf's related to the expenses.

FRAMEWORKS,LIBRARIES & PACKAGES USED :
  - React Js,Redux,Redux Thunk,React-Router-Dom,Axios,Node,Express,MongoDb,Ant D,Formik ,Yup ,JWT, Ant design, Validator, Axios, Sweet alert, Multer, Mongoose unique validator, Mongoose delete,React Google Charts.

YouTube Design Clone
GitHub:

- "I gained proficiency in CSS by studying online tutorials and practicing the concepts through a guided project where I cloned the design of YouTube using HTML and CSS."

EDUCATION

BE in Electronics & Communication Engineering.   Jun '14 - May '18

Angadi Institute of Technology,VTU.   AITM,Belagavi.

- 62%

CO-CURRICULAR ACTIVITIES

- Volunteered in a 10 day Vipassana meditation course in Bangalore's centre.
- Organized technical fests for ECE departement during graduation.

HOBBIES

- Cooking
- Travel expeditions
- Reading Vedantic and Upanishad texts to gain knowledge about ancient Indian philosophy and spirituality.

LANGUAGES

English,Kannada,Hindi,Marathi.
